Hip Pain	Jaw Pain	Knee Pain
Leg Pain	Low Back Pain	Mid Back Pain
Neck Pain	Shoulder Pain	Upper Back Pain
Wrist Pain	Forearm Pain	Buttocks Pain
Thighs Pain	Calves Pain	

Never has there been a better or faster way to do patient notes.

Have a paperless office with Chiro QuickCharts. From the moment a new patient walks in the door you will enjoy the benefits of our patient check-in kiosk system. Patients enter past medical history and then enter daily subjective data on subsequent visits.

Better manage the flow of patients as they move through your practice with our patient tracking. See where patients are located and chat with office staff without being interrupted.

See past visits with our Travel-Card Patient Chart. Enjoy the benefits of seeing all the needed data (plan, diagnosis, last exam, etc.). Then simply create powerful soap/initial exam reports to send to insurance when requested.

Why *Chiro QuickCharts* is the best for your practice:

Best design- It is a great looking system designed with the help of many chiropractors.

Best patient progress- See many visits all on the same screen by using a time-tested **travel card** style patient chart.

Best Workflow- Patients check themselves in each visit. See who is waiting and how long they have been waiting.

Best Customization- *Chiro QuickCharts* gives you the ability to add your own items easily from one central customizing section.

Best Reporting- Generate great looking reports for ANY or ALL of your patient visits.

Best Patient Documentation- Patients enter a full medical history from your lobby or desired location. Then the information is automatically carried into your initial exam note.

Fastest Note Time- Get great notes in a fraction of the time of writing them out by hand.

Best Product Team- We are a team that listens to what you need.

Ease of use- Our system is so easy to use, you can begin using it to document patient visits the very first day you install it.

Chiro Quick Charts Pricing:

Chiro QuickCharts has it all and is a great investment for your practice. We offer more features than the other systems and have top-notch technical support. Buy *Chiro QuickCharts* for \$2,495 (single doctor practice). For multiple doctors please contact us for a price quote at:

Chiro QuickCharts Return on Investment Report

Chiro QuickCharts returns your investment in a number of ways. First, there will be no more pulling charts. Second, patients can be “paperless” from their very first visit. Last, the time YOU spend doing reports will be at least cut in half!

Now, with that said, let’s give you an idea of how much you may save with the following example. We will use a moderate volume, single doctor practice with these stats:

Patients seen per week: **150**

Number of hours on reports per month: **15**

We estimate a chart takes 30 seconds to pull and 30 seconds to file, so 1 minute of staff time for each patient that you see. We are using \$10 per hour of staff time for our numbers. For the time spent on reports, we are estimating cutting the time in half and using \$40 per hour for your (doctor’s) time.

In this example *Chiro QuickCharts* saves a total of \$4,466.00 per year in staff and doctor time. (\$866 filing time and \$3,600 doctor time)

If you have multiple doctors, see more patients or spend more time on reports than our example, *Chiro QuickCharts* will save you even more. After the first year, you will be able to do more with less in your practice AND have better quality documentation.

If you would like a custom return on investment report for your practice, please let us know.

NOTE: This estimate does not factor in the cost of charts and paper that you will be saving!!
