RelayAssurance™ Attachments **Easily Manage Worker's Compensation and Property & Casualty Claims Electronically**

Processing and submitting Worker's Compensation (Worker's Comp) and Property & Casualty (P&C) claims has always presented unique challenges. Many require manual processing and the attachment of supporting documentation, which prevents electronic submission. These challenges result in higher costs to the provider, higher rejections and slower reimbursement.

RelayAssurance™ Attachments is the solution for submitting Worker's Comp and P&C claims and their associated attachments efficiently and effectively. By enabling electronic submission, you can use one solution for these specialty claims and bypass the effort and expense of paper processing.

Manage All Claims Using One System

Electronic submission offers many benefits which you can now apply to specialty claims. Using the web-based portal, RelayAssurance Attachments

enables you to create the claims using your current system, and then add the required attachments before submitting the claim for adjudication. This bypasses the inefficiencies and additional cost of paper processing and eliminates the need for dual systems.

Maintain Compliance and Avoid Penalties

Several states already mandate the electronic submission of specialty claims and many others will soon require it. Using RelayAssurance Attachments ensures you can stay compliant while also receiving timely reimbursement for claims without disrupting your current use of resources.

Reduced Costs and Faster Reimbursement

By eliminating inefficient manual processing, you can reduce the costs associated with managing Worker's Comp and P&C claims. And faster, more

Key Functionality:

- Works with electronic claims management system
- Streamlines Worker's Comp and P&C claims management process
- Minimal IT investment or support required
- Connectivity to comprehensive payer list
- Meets state- and payer-specific requirements
- Manage attachments or supporting documentation

RelayAssurance Attachments Helps:

- Eliminate effort and expense of paper claim processing
- Streamline attachment process
- Reduce administrative costs and write-offs
- Faster reimbursement
- Comply with State mandates for electronic claims submission

efficient claims submittal leads to quicker reimbursement. With no set-up fees, you only pay a small per claim fee for attaching documents. Lower costs + better cash flow = greatly improved financial performance.
